Hello,

I saw your asset, RateBox (<https://www.assetstore.unity3d.com/en/#!/content/75190>) on Unity Asset Store, and I would like to ask some questions:

- Do this asset has some limitations about its use? Eg.: 1 license per-seat
- Once bought, am I able to change its code, without violating any license?

Cheers,

Luciano Trindade Pereira

Hello,

- Do this asset has some limitations about its use? Eg.: 1 license per-seat

No, once you've bought it you're free to use it as part of your projects.

- Once bought, am I able to change its code, without violating any license?

Yes.

The only thing you're restricted to do is to distribute asset itself.

Best Regards,

Nikolay
